SUPPLEMENT TO  
REPORT NO. 25X1X

25X1A [ ] Comment. Bright stock oil is a lubricating oil of especially high viscosity. Negotiations have been held for some time with a view to expanding the existing bright stock installations at the SAG hydrogenation plant in Zeitz-Troegwitz or to build a new bright stock installation at the VCB refinery in Luetzkendorf. Plans are being made in order to meet requirements for this lubricating oil in East Germany.
